Chess Studio

Chess Studio is the new application for iPhone and iPad to manage chess databases in pgn format. With Chess Studio you can create your own databases, download them from internet or import them from other applications, you can insert, annotate, analyse, classify and study games. Chess Studio allows you to organize your chess databases in folder and subfolder depending your needs. You can copy games from a database to another database, you can create a database for each opening, player or other theme you prefer.

A section of Chess Studio is devoted to the famous weekly magazine "The Week In Chess": you can read online the magazine and download the games.
With Chess Studio you'll always be updated with the latest chess news and you can really improve you game and your chess skills.

This and more in the first version of Chess Studio. Improvements and other features in the future releases.

I apologize for any error or problem. They will be promptly corrected.
